GILMER PEREZ

Digital Growth Specialist | Web Development, SEO, Paid Media & Analytics
(407) 350-1805 | gilmer2002@outlook.com | Kissimmee, FL | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Digital growth specialist who covers the full path from website to customer: I build and host the site, make it rank in search, track what it does, and run paid ads that send it qualified traffic. As an Assistant Team Leader in SEO & PPC, I manage organic and paid strategy for a varied portfolio of client websites built on WordPress, Squarespace, Wix, and custom code. Because I can also write the code, I fix technical problems directly, and I turn GA4 and Search Console data into clear recommendations that business owners can act on. I work best as a business's complete digital partner, taking one goal and carrying it through the site, search, ads, and reporting.

CORE SKILLS

- **SEO & Content Strategy:** Technical SEO (Schema Markup, JSON-LD, Meta Tags), On-Page and Off-Page SEO, Local SEO (Google Business Profile, Map Pack), AEO & GEO (Answer/Generative Engine Optimization), Keyword Research, Core Web Vitals.
- **Paid Media:** Google Ads, Meta Ads, Walmart Ads, Spotify Ads, and other platforms depending on client needs; campaign setup, optimization, and cost-per-click reduction.
- **Analytics & Reporting:** Google Analytics (GA4), Google Search Console, Google Tag Manager, CRM integration, monthly performance reporting.
- **Web Development:** Next.js, React, TypeScript, JavaScript (ES6+), Semantic HTML5, CSS, Tailwind CSS, Bootstrap, Responsive Design, Accessibility (WCAG), Node.js and Express fundamentals; CMS experience with WordPress, Squarespace, and Wix.
- **Hosting & Infrastructure:** DNS Management, SSL/TLS Security, Domain Registration, Managed Hosting (Vercel, Netlify, Render), CI/CD Pipelines, Git/GitHub.
- **Tools:** VS Code, Chrome DevTools, Lighthouse Performance Auditing, Basecamp.

EXPERIENCE

The AD Leaf Marketing Firm | *Orlando, FL*
Assistant Team Leader, SEO & PPC | *Feb 2026 – Present*
Drive organic growth and paid acquisition for a diverse portfolio of client websites, combining search strategy, advertising, analytics, and hands-on technical work.

- **Search Strategy:** Build on-page and off-page SEO strategies that help local and regional businesses appear where their customers are searching, including in AI-driven results through AEO and GEO.
- **Paid Media:** Plan, launch, and optimize Google Ads campaigns and manage advertising on Walmart Ads, Spotify Ads, and other client platforms, with working knowledge of Meta Ads, focused on qualified traffic and efficient spend.
- **Analytics & Reporting:** Set up tracking with GA4 and Google Tag Manager and turn the data into recommendations clients can act on to generate leads and grow revenue.
- **Technical SEO:** Audit sites across WordPress, Squarespace, and Wix and fix crawling, indexing, and Core Web Vitals issues directly, including plugins, hosting, domains, SMTP, and custom code.
- **Local Search:** Manage Google Business Profiles, schema markup, and citations to improve placement in the Local Map Pack.
- **Client Communication:** Lead periodic client calls and keep project updates organized in Basecamp so clients always know what is being done and why.
- **Team Leadership:** Promoted to Assistant Team Leader in May 2026. Mentor fellow SEO & PPC specialists, serve as a point of escalation, and present the department's presentations.

Manrique Studio | *Remote*
Founder, Web Developer & Digital Strategist | *Jun 2023 – Present*
Founded a digital consultancy that gives small businesses one partner for their website, search visibility, and online presence.

- **Complete Digital Partner:** Serve as the primary point of contact for small business clients, turning their goals into a clear plan across the website, search, and online presence.
- **Websites Built to Rank:** Design, build, and deploy custom, SEO-optimized, mobile-friendly websites with Next.js, React, and TypeScript, so each site is fast, accessible, and ready to be found from day one.
- **Local Visibility:** Set up and manage Google Business Profile listings, schema markup, and metadata, and run local SEO strategies that bring in qualified organic traffic.
- **Reporting:** Track results with analytics and CRM dashboards and deliver monthly performance reports that show clients what is working.
- **Technical Infrastructure:** Manage the full technical lifecycle for client sites, including domain registration, DNS configuration, SSL/TLS certification, and cloud hosting (Vercel, Netlify), with ongoing maintenance and support.
- **Brand & Presence:** Support clients with brand identity, logo development, and social media setup so each business presents a cohesive, professional image online.

PROJECTS

- **Kingdom Movement:** A fitness website built to win local search and turn visitors into gym members, using geo-targeted SEO, schema markup, and landing pages that lead into membership sales.
- **Moonstar Esthetics:** A service website with a search-first structure that helps new clients find the business and book appointments, with strong Core Web Vitals and content the owner can update without a code deployment.
- **Bubbalous Bodacious BBQ:** A restaurant ordering site built for fast mobile load times, with secure payments connected to the in-store point-of-sale system so orders stay accurate.

EDUCATION

University of Central Florida – *Full-Stack Web Development Certificate*

- Full-Stack Architecture: Architected and deployed three complex web applications, handling everything from database schema design (SQL/NoSQL) to front-end state management.
- Intensive Engineering Simulation: Completed a rigorous, project-based curriculum focusing on the MERN stack, simulating a real-world software engineering environment.
- Agile & DevOps: Gained practical experience in Agile/Scrum methodologies, git version control, and deploying applications via CI/CD pipelines.

Valencia College – *Associate of Arts*

- Academic Excellence: Consistently recognized on the Dean's List (Fall 2019, Summer 2020, Fall 2020) for outstanding academic performance.
- Focus: Developed strong analytical and time-management skills, completing the degree program with a focus on problem-solving and logic.

PROFESSIONAL DEVELOPMENT

Advanced SEO & Analytics Strategy – *Self-Directed / Industry Research*

- In-depth study of Google Analytics 4, Google Search Console, and Schema.org implementation, with a focus on technical SEO audits and Core Web Vitals optimization.

The Complete Full-Stack Web Development Bootcamp – *Udemy (Angela Yu)*

- Completed 60+ hours of instruction and built 30+ projects, including RESTful APIs, authentication systems, and database-driven applications.

Zero to Full-Stack Web Development – *The Odin Project*

- Open-source curriculum focused on core JavaScript concepts, clean code principles, and advanced Git workflows.
